

re amendment no 1572-4

rin 1652-aa17

comment on page 2 of 66 - i do not think the crime of drug possession should just be discarded. this is a serious crime and i think someone who was convicted of it should be disqualified as a security risk.

comment on page 5 - TSA received comments only from financially interested folks and the general public seems unaware of exactly what is going down here. there should be an effort made to get the general public involved here so that a better law is the result. i advocate expansion of time to comment and a press release on how to comment to be sent to the public.

comment on page 7 - a personal interview should be required for all drivers all the time every year.

comment on page 9 - states should be made responsible and time period for authenticating documents needs to be extended. that is the way you get secure. there should be absolutely no instantaneous approvals and a personal interview of each potential driver should be done, with rigorous questioning.

comment on page 10 - if this agency allows a driver to blow up america, commerce will really stop completely. if you let criminals drive same can happen. the need to keep commerce moving means moving safely. commerce stops dead if the people think a bomb, explosives are around. so safety is absolutely paramount. comment on page 11 - Arson is a crime. people who have committed arson should not be driving trucks. it should disqualify them from this job. Committing a series of robberies also should disqualify a driver from getting a license to do this job.

comment on page 12 of 66 - the waiver program stinks/sucks. i oppose and object to all waivers. you either make it or you dont.

Congressional political hacks could have been bribed to look for these special regulations for aliens, which endanger all americans. do not let this kind of congressional pressure persuade you to make america less safe. Employers want to hire aliens - that is a very bad move to allow. American citizens should have first crack at jobs - not all of these aliens who are coming into america taking american jobs. These employers, with their cries for aliens to fill these jobs, are anti-american and expose other americans to danger!

comment on page 33 -if a threat is found out about a driver, all of his driving privileges should be suspended immediately.

comment on page 34 - if a security issue has arisen, the driver has no privilege to drive until a waiver is granted or a decision is made. i do not believe arsonists should be allowed to drive an explosive truck.

comment - how are you going to find out if someone has a mental incapacity unless you have a personal interview?

comment on page 43 -it is disappointing that the trucking industry seems to want to pay low wages to aliens and thereby expose all americans to danger.

comment on page 46-a \$1000.00 fee does not matter since many drivers are quite well paid for this job and their employers should be paying the fee anyway. truck drivers mainly make more than the average u.s. wage rate.

comment on page 48 -i do not think this proposal is rigorous enough. hijackers from al quaida can get through this.
